ABOUT ME

Software developer with experience working on technologies like Node.js, Express.js, Sequelize, SQL, MongoDB, React, Redux and C# .Net Core. I am a person with great motivation to learn, organized and flexible to changes. I have strong technical, social and teamwork skills. Obtained through my last training academic. I look to be part of a challenging company in which I can grow and expand my knowledge.

PROJECTS

- Design and creation of an application for small and medium-sized fit-center, giving their owners the possibility an incorporated valuable service added through the app. In it, users will be able to see the weekly schedule of the gym, its staff, the facilities and see the routines with its exercises. Also too the possibility of buying gym products or gym membership, through the Mercado Pago payment gateway.

- Design and creation of an application for view video games. The web app show all information obtained on <https://rawg.io/> (external api), it can also create edit and show information from a database "PostgreSQL" through an api created with nodejs, javascript, express and sequelize.
